How the scores work

Each channel is scored from 1 to 5 on Money (budget), Authority (who can say yes), and Need (fit with this product). The total is the sum, out of 15.

Ties break by Money, then Authority, then Need, then channel type (importing country, buyer type, trade show, job title, marketplace, RFQ board, community), then name.

Scores on curated channels are editorial judgments explained in the reason and tied to a public page. Company types use the United States NAICS classification from the U.S. Census Bureau. Job titles use the United States O*NET occupation classification. Shows, marketplaces, directories, and communities cite their own sites. These scores are not measurements.

Importing-country Money is not editorial. Rank 1 in the Comtrade response scores 5, ranks 2-3 score 4, ranks 4-10 score 3. Authority is 4 because importers in that country hold the order. Need is 5, 4, or 3 according to whether the HS heading is specific, close, or a broad basket. The dollar figure is the unmodified primaryValue literal.
